Education

Andrews University

B.S. Computer Science

Berrien Springs, MI
August 2023 - May 2027

- GPA: 3.5
- Relevant Coursework: Software Engineering, Operating Systems, Data Structures and Algorithms, Artificial Intelligence, Media Applications Development, Web Development

American Preparatory Academy

Draper, UT
August 2022 - May 2023

- GPA: 3.8
- Class Valedictorian, President of Computing Club, Python Development Summer Class.

Leadership & Work Experience

Synergy Power, Inc

Software Engineer Intern

Remote
January 2026 - Present

- Engineered a local-first AI assistant running on NVIDIA Jetson Thor, integrating a Llama-family LLM with Home Assistant via REST and WebSocket APIs to enable real-time voice-controlled smart home automation with zero cloud dependency
- Designed and implemented a multi-service microservices architecture (FastAPI + Docker Compose) across 4 decoupled services, orchestrator, LLM server, voice pipeline, and RAG document service, enforcing stable API contracts across milestone deliverables
- Built a safety-gated tool execution pipeline with PIN lockout persistence, SQLite session management, and structured confirmation flows, reducing risk of destructive HA actions in production
- Developed a RAG (Retrieval-Augmented Generation) document Q&A service supporting local ingestion, embedding, and citation-grounded answers for private knowledge bases

Centro de Medios Adventista

Web Developer

San Cristóbal, Venezuela
June 2018 - December 2018

- Diagnosed and resolved HTML, CSS, and JavaScript bugs across the organization's public-facing site, maintaining consistent uptime for media and content delivery
- Built and integrated new site features in collaboration with the media team, improving functionality and cross-platform presentation for organizational audiences

Projects

TimeTube | JavaScript | github.com/jpalacio0x/timetube

- Built an AI-powered web app that ingests any YouTube video URL and auto-generates structured timestamps, leveraging speech-to-text transcription and LLM summarization

palacioj.com — Terminal Portfolio | TypeScript | palacioj.com

- Designed and deployed a personal developer portfolio with a custom terminal-emulator UI built in TypeScript, live at palacioj.com

JuliosBoots — Minecraft Mod | Kotlin | github.com/jpalacio0x/juliosboots

- Developed a custom Minecraft mod using Kotlin and the Fabric/Forge modding API, extending core game mechanics through JVM bytecode integration

Additional Info

- **Languages:** Python, C++, TypeScript, JavaScript, Kotlin, SQL
- **Software:** Docker, Docker Compose, FastAPI, Node.js, React, SQLite, Git, REST APIs, WebSocket, OpenAI-compatible APIs
